COUNTY HIGHWAY EXTENSION

AND

RESEARCH AT PURDUE

This publication on Population Trends for Indiana Counties—Cities—Town 1960 — 1970 is compiled and distributed as a county highway extension activity of the HERPIC project at Purdue University. The Highway Extension and Research Project for Indiana Counties (HERPIC) was organized at Purdue in 1959 to implement legislation by the Indiana General Assembly authorizing programs of extension and research for County Highway Departments throughout the State.

The financial support for these programs of extension and research is derived from 1/8 of 1% of the MVHA funds made available to the 92 counties from gas taxes and license fees collected by the State of Indiana. The legislation by the General Assembly also designated Purdue University through its Engineering Experiment Station and School of Civil Engineering to develop and coordinate these programs.

The HERPIC program of extension and research provides for the preparation of manuals and bulletins setting forth recommended procedures and for regional workshop conferences with county road officials throughout the state to review typical road problems for their area. All of these activities are designed to assist and guide county highway officials in their problems of management, planning, design, and operation of county highway departments.

The HERPIC project operates as a cooperative effort between the County Commissioners of Indiana and Purdue University. The program of extension and research is guided and approved by a twelve-man Advisory Board, consisting of six County Commissioners from over the State and six members from the staff of Purdue's School of Civil Engineering. The current membership of the HERPIC Advisory Board is listed herewith.

Population of U.S.—1970	IBC

Indiana's population increased from 4,662,498 to 5,193,669 during the 10-year period ending April 1, 1970, according to the final counts of the 1970 Census of Population. This increase of 531,171 represents a percentage increase of 11.4% for the 10-year period, which compares 13.3% increase for the total U.S. population for the same period. It should also be noted that Indiana ranks 11th in the Nation for total population count.

The 1970 population census presents a new base or dimension for estimating future needs and growth. Business and industry are always alert to new census figures, since they can be translated into market demands and other economic factors. Census figures also serve as a basic planning yardstick for estimating the needs for local government services. With the new 1970 census available, it is appropriate and timely for local county officials to consider these population figures and trends in relation to needs and requests for local government services, such as roads and streets, schools, sanitation, utilities, etc.

To assist Indiana county, city and town officials in making a more comprehensive interpretation of the 1970 census figures, this report presents tabulations and rankings that permit a direct comparison of population growth and population totals for city, town and county units. The basic data for these tabulations are taken from official 1970 census reports.

The tabulations in this booklet show rural population for the county unit as the difference between the total population for the county and the total population for all incorporated cities and towns in the county. This interpretation of rural population is at variance with that used in the official census reports and should be noted in the comparison of rural and urban population figures from the official census reports.

For those Indiana county officials who are directly responsible for planning and estimating their county's future needs for local government

services, the following official census publications are recommended as detailed office references. These publications contain more detailed population data and classifications than included in this booklet.

U.S. Bureau of the Census, U.S. Census of Population: 1970, Number of Inhabitants, Indiana, Final Report PC(1)-16A, U.S. Government Printing Office, Washington, D.C., 1971, \$0.40.

U.S. Bureau of the Census, U.S. Census of Population: 1970, General Population Characteristics, Indiana, Final Report PC(1)-16B, U.S. Government Printing Office, Washington, D.C., 1971, \$1.25.

U.S. Bureau of the Census, U.S. Census of Population: 1970, Number of Inhabitants, United States Summary, Final Report PC(1)-1A, U.S. Government Printing Office, Washington, D.C., 1971, \$1.25.

EARLY COUNTS IN INDIANA

Indiana was organized as a Territory in 1800 and was admitted to the Union as the 19th State in December, 1816. The 1800 census figures show about 2500 persons located in what is now the State of Indiana. The decennial census figures for Indiana 1810-1970 are as follows:

1810	24,520	1860	1,350,428	1920	2,930,390
1820	147,178	1870	1,680,637	1930	3,238,503
1830	343,031	1880	1,978,301	1940	3,427,796
1840	685,866	1890	2,192,404	1950	3,934,224
1850	988,416	1900	2,516,462	1960	4,662,498
		1910	2,700,876	1970	5,193,669

The 1840 census seems to be the first Indiana census to be compiled by counties. In that census (also 1850), Wayne County was the most populous county in the State, probably because it served as a "gate-way" into Indiana via the National Road, now US 40.

Indiana's present-day population centers were well-established and growing communities shortly after the turn of the century. In fact, the most of today's population centers were among the leaders in the early census figures for the State.

COUNTY COUNTS-1970

The final count figures for the 1970 Census indicate that Indiana's population has increased from 4,662,498 in 1960 to 5,193,669 for 1970—an increase of 531,171 (or about 11%) during the last decade.

A tabulation of the final count figures by counties (see Table 1) shows that the increase in state-wide population is distributed among 76 counties, with minor losses occurring in the remaining 16 counties. Counties having an increase of 10,000 or more include:

Allen	Howard	Marion
Clark	Johnson	Monroe
Delaware	Lake	Morgan
Elkhart	LaPorte	Porter
Hamilton	Madison	Tippecanoe
Hendricks		

Of these, Marion County's increase of some 94,000 is the greatest increase in numbers. Percentage-wise however, Porter County's 44.5% increase tops the list.

Besides the new population counts and increases by counties, the state maps of county population figures (see pages 16 and 17) enhances their comparison by geographic area. This also makes it convenient to review the population trends of the so-called "bed-room" communities adjacent to our major metropolitan centers.

POPULATION OF RURAL AREAS

The population figures for rural areas (see Table 5) are determined for each county as the difference between the total population for the county and the total population for all incorporated cities and towns in the county. Therefore, the population figures for Rural Areas represent all unincorporated areas for each respective county.

In all cases, the County Total represents the final population count within the respective County-Line Boundaries. Therefore, in counties with county-line Towns, the tabular values for Rural Areas are:

- (a) increased slightly if the smallest portion of the town lies within the county, and

- (b) decreased slightly if the largest portion of the town lies within the county.

COUNTY LINE TOWNS

In 1970, Indiana had 13 county-line towns lying in two adjacent counties. In such cases, the total town population (see Table 5) is reported only in the County having the largest share of the Town population. The following is a list of the county-line towns, their total population and a break-down of population counts in each adjacent county.

TOWN County	1970 Popul.	TOWN County	1970 Popul.
ASHLEY	721	MARKLE	963
DeKalb	413	Huntington	786
Steuben	308	Wells	177

HAMILTON	537		
Steuben	439		
DeKalb	98		

"UNI-GOV" CONSOLIDATION OF MARION COUNTY - INDIANAPOLIS

The 1969 General Assembly enacted legislation providing for the consolidation and reorganization of local government in Marion County (Acts 1969, Chapter 173), commonly referred to as "Uni-Gov". The popular conception of this legislation is that the jurisdiction and limits of the "Consolidated City" (Indianapolis) was extended to the county boundaries of Marion County, with the exception of "Excluded Cities" - Beech Grove, Lawrence, Southport and Speedway City. Accordingly, the "advance" 1970 census figures for Marion County, report population counts as follows:

MARION COUNTY	792,299
Beech Grove	13,468
Indianapolis	744,624
Lawrence	16,646
Southport	2,505
Speedway City	15,056
Total for	
Cities and Towns	792,299

Thus, the population counts in the "advance" reports considered the city of Indianapolis to be all of Marion County with the exception of the other four cities listed.

DISTRIBUTION OF STATE-COLLECTED TAXES TO LOCAL UNITS IN MARION COUNTY

The "Uni-Gov" law (Acts 1969, Chapter 173) also creates a "Fire Special Service District", with boundaries initially coterminous with Indianapolis corporation boundaries. The act further provides for the Motor Vehicle Highway Account Fund to be allocated to the Consolidated City using the population inside the Fire Special District and to the County using the miles of county roads outside the Fire Special Service District. This creates the need for a separate census count inside the Fire Special Service District (generally coextensive with the old Indianapolis corporation boundary); likewise the need for a separate road mileage inventory outside the Fire Special Service District.

The act further provides for the Motor Vehicle Highway Account Funds, the Cigarette Tax Funds and Alcoholic Beverage Taxes to be allocated to each City and Town in Marion County the same as under other applicable law. Since all such allocations are based on population, this means that separate population counts will be needed for all cities and towns in Marion County, the same as in the past.

The population figures for Cities and Towns in Marion County listed in Table 5, are taken from a final census report, with the exception of "old" Indianapolis; and this is believed to be a very close estimate. (See footnotes for Marion County, page 26, and for Indianapolis, page 12.)

	1,500—4,999	112	20.0	308,822	9.6	93.0
	500—1,400	208	37.2	185,697	5.8	98.8
	1—499	147	26.3	40,389	1.3	100.0
State Totals		559	100.0	3,205,020	100.0	

Towns Greater Than 1500 Population

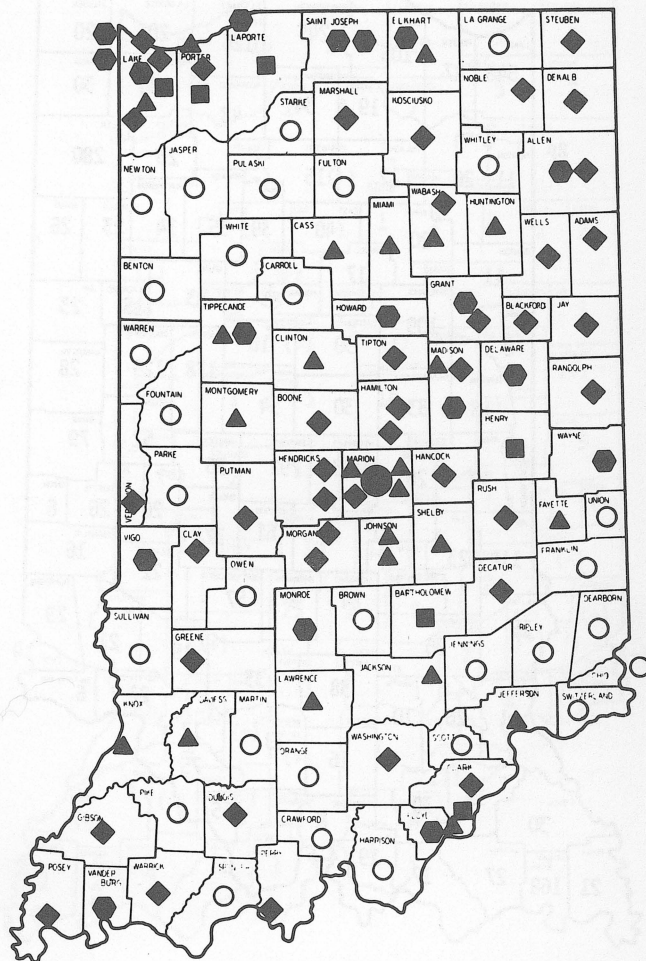

In Indiana, Towns are established as incorporated places having less than 1500 population; however many places having more than 1500 population are still classified as Towns, since they have not held the necessary elections to become Cities. At present there are 66 Fifth Class Cities (see Table 3), but some 153 incorporated places that might qualify as Fifth Class Cities (see Table 4).

Towns Greater Than 5000 Population*

TOWN	County	1970 Town Popul.
CLARKSVILLE	Clark	13,806
CARMEL	Hamilton	6,568
BROWNSBURG	Hendricks	5,186
PLAINFIELD	Hendricks	8,211
CEDAR LAKE	Lake	7,589
GRIFFITH	Lake	18,168
HIGHLAND	Lake	24,947
MUNSTER	Lake	16,514
SPEEDWAY CITY	Marion	15,056
MOORESVILLE	Morgan	5,800
CHESTERTON	Porter	6,177
NORTH MANCHESTER	Wabash	5,791

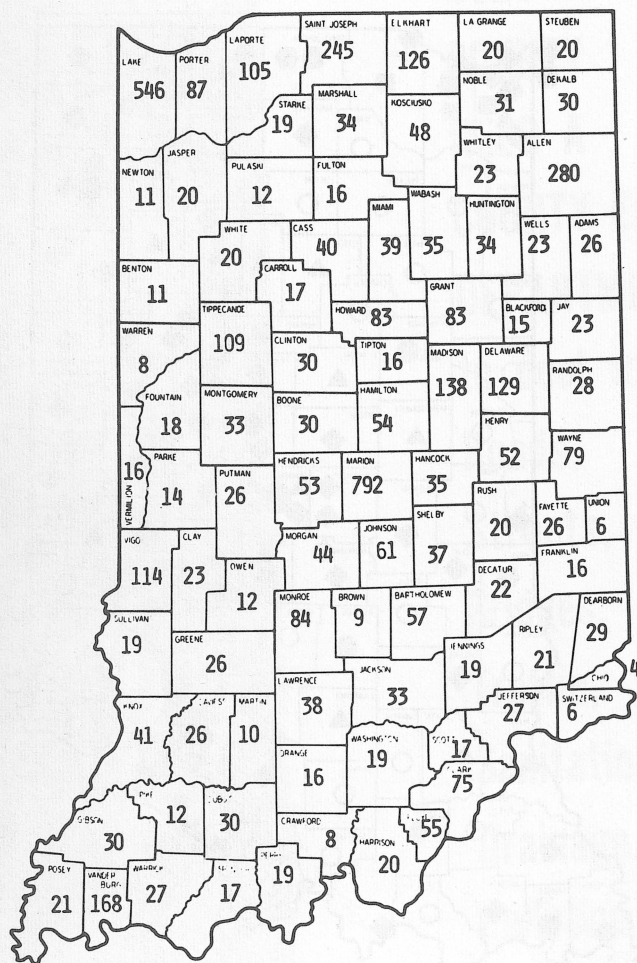

*This listing included since Indiana statutes (1971) require a system of Arterial Streets for all Cities and Towns over 5,000 population; a system of Arterial County Roads also required for all Counties.

**COUNTY LOCATION
OF INDIANA CITIES AND TOWNS
BY POPULATION GROUPS**

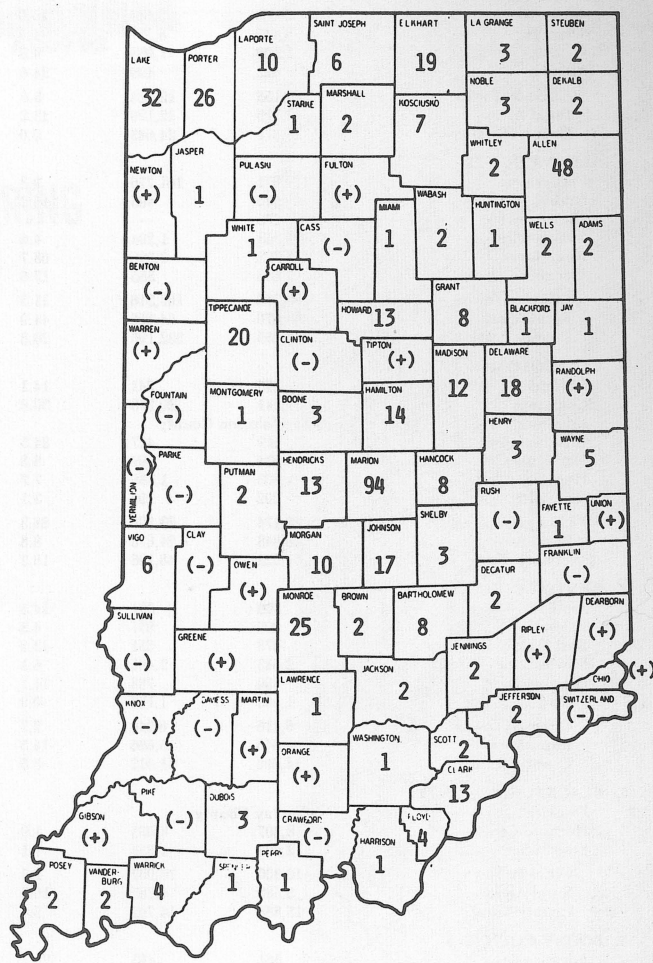

- over 250,000
- ⬢ 35,000—250,000
- 20,000—35,000
- ▲ 10,000—20,000
- ◆ 5,000—10,000
- County has no city or town over 5,000 population.
